Capability Statement

FlyOnE is pioneering goods and services in the emerging green air transport market to capture a large slice of the market share both in Australia and in global markets.

Bringing together industry leaders and innovators in the manufacture, supply and distribution of electric aircraft, FlyOnE is establishing market-leading ESG friendly air transport solutions for corporate bodies and recreational users alike.

With established flight school partners, an experienced supply and distribution team, aircraft demonstrator stock on hand, trained electric aviation engineers and developers in-house, FlyOnE is capable of delivering all products and services related to the supply, service, operation, training and infrastructure developments relating to Electric aviation.
